## PRODUCT CATALOG

RESIDENTIAL AND COMMERCIAL

**Drexel Metals** provides a wide range of coils, gutter profiles and accessories to ensure a perfect match between your roof and gutter system. Our gutters are produced from high-quality American metal and come in a wide range of standard finishes, with custom options available to match any project. Rapid shipping and stocked products will help keep your project on track.

Drexel has been synonymous with high-quality products and first-class customer support for more than three decades. Since its foundation in 1985, Drexel Metals has become a leading manufacturer and distributor of painted metal roofing systems, equipment, perimeter edge metals, and custom fabrication services. In addition to our own manufacturing, we extend our fabrication capacities to local authorized fabricators, certified installers, and distributors that further market Drexel's proven products – all site-certified by Drexel's industry-leading warranty programs. Today, Drexel is backed by the technological resources and corporate stability of a century-old icon in the building ecosystem – Carlisle Construction Materials.

## GUTTER PROGRAM

Drexel Metals offers gutter styles including K-Style, Half Round and Box. Box gutters come in variations tailored to both commercial and residential applications. Each style is offered with numerous components to ensure a complete gutter system.

## HIGH-PERFORMANCE METAL FINISHES AND COLORS

In partnership with Sherwin-Williams® Coil Coating, Drexel Metals offers high-performance finishes ideally suited for commercial, residential, restoration and custom applications. Between a Fluropon® finish and Drexlume™, there is a perfect look for every roof.

## PANELS, COILS AND SHEETS

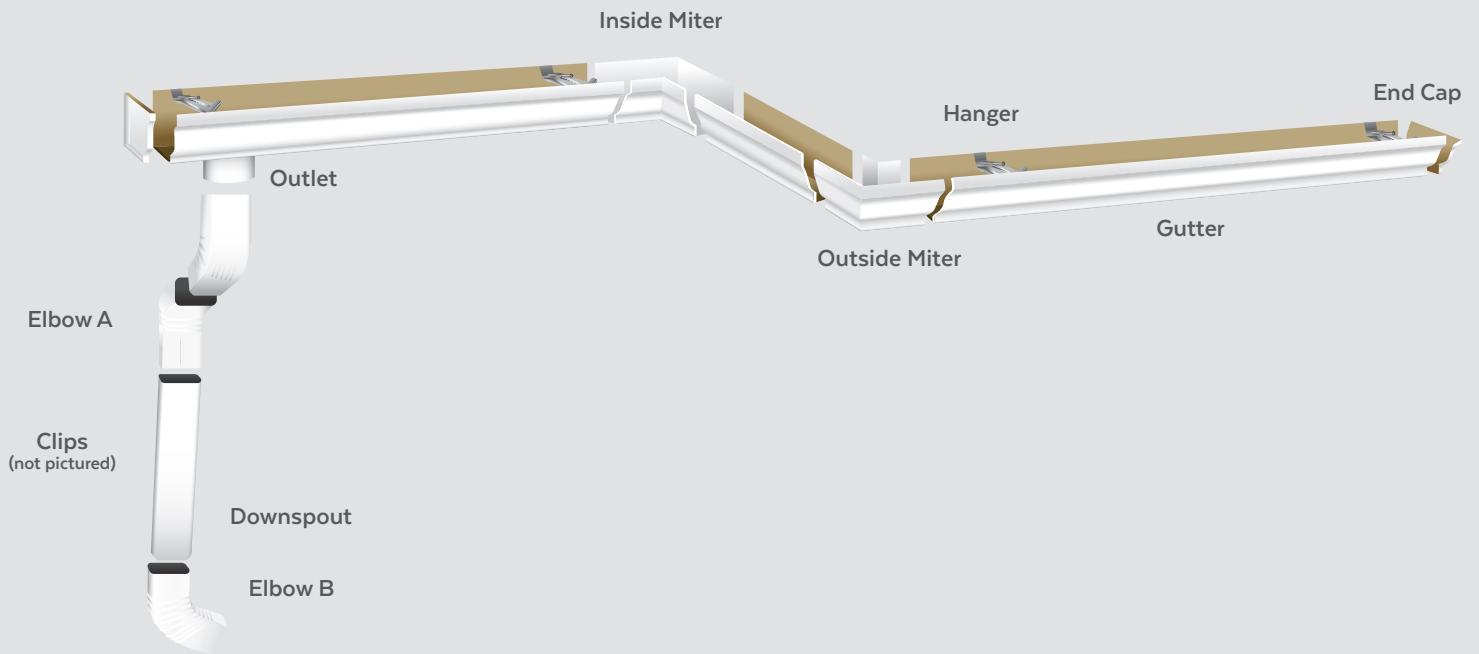

In addition to gutters, Drexel offers metal roofing panel profiles, coils, and sheets. Panel profiles include both snap lock and mechanically seamed structural and architectural variants. Panels can be additionally altered to include various rib options – or even a completely curved panel.

Drexel knows every job and every customer are different. That is why we stock our product in both coils and flat sheets. Our wide selection of coils allows the contractor to create field-rolled and site-formed panels. Flat sheets, on the other hand, offer the contractor more freedom to fabricate custom pieces, including specialty trims and accessories.
