LEED DEFINITIONS – Building Product Disclosure and Optimization – Sourcing Materials:

Recycle Content:

Recycle content is the sum of post-consumer content plus ½ the preconsumer recycled content, based on cost. Products meeting recycled content criteria are valued at 100% of their cost for the purpose of credit achievement calculation.

For credit achievement calculation, products sourced (extracted, manufactured, and purchased) within 100 miles of the project site are valued at 200% of their base contributing cost.
